A 20x20 grid of squares. The squares are arranged in 20 rows and 20 columns. Some squares are shaded gray, while others are white. The shaded squares are located at positions (row, column) where both the row and column indices are odd, ranging from 1 to 19. Specifically, the shaded squares form a 10x10 subgrid in the top-left corner of the 20x20 grid.

A 20x20 grid of squares, each containing a single character from the Chinese alphabet. The characters are arranged in a regular pattern, with some characters appearing more frequently than others, suggesting a statistical analysis of character frequency.

A 10x20 grid of empty boxes for handwriting practice. The grid is composed of 10 rows and 20 columns of identical empty rectangular boxes, designed for students to practice writing the letters 'a' and 'b'.

A 20x20 grid of squares. The grid contains 400 squares in total. Approximately 100 squares are filled with black, forming a sparse, irregular pattern. The black squares are distributed across the grid, with some small clusters and many empty spaces. The pattern is not symmetric and appears somewhat random.
